

Suggested Browser and System Requirements

WrapStat is designed to be flexible, easy-to-use, and compatible with PC and Mac systems. WrapStat performs optimally with any HTML5 web browser, specifically: Google Chrome, Mozilla Firefox, Microsoft Edge, and Safari. The developers do not recommend using Internet Explorer as it is no longer supported by Microsoft.

To ensure that you receive system-generated emails, such as change of password confirmation, please add the following email addresses to the Safe Senders List in your email program.

- WrapStat Support <impactsupport@3cisd.com>.
- wrapeval@uw.edu

Turn off all pop-up blockers so you can access each function of the WrapStat system.
